JOSHUA LEDERBERG

FEB 16 1971

P.S. The privileged rate is based on the R&D relevance and utility of the real-time projects. Within the school, the sense of common purpose is enforced by mutual peer contact.

There is no reason this should not be achievable with other university groups. However, outside users should be informed that the 1/2 c. rate is not offered as a mere utility, but is associated with an intention to cooperate in technical enhancement of the total system.
